Levan Bakradze

WEB DEVELOPER

Profile

Since the age of 15 coding has been my passion. I first started with html, CSS, JavaScript and completed the first courses about Responsive Web Design and JavaScript Algorithms and Data Structures. Since then I always wanted to improve and learn as much about coding as possible, so I started learning Node.js and React. I learned a lot from those courses and made personal projects for practice. I love challenges and things that make you think and grow.

Education

Bachelor of Computer Science, Tbilisi State University, Tbilisi

SEPTEMBER 2021 — JULY 2024
